PROFESSIONAL SUMMARY

I'm a Junior Frontend Developer who's good at writing neat and effective code. I know my way around frontend technologies and understand how to build things well. I like learning new stuff and keeping up with the latest tech trends. I'm good at solving problems, and I enjoy working with others in a team. I'm excited about the chance to learn and contribute while getting better at frontend development.

EXPERIENCE

Junior Software Developer   **2021 – Present**
Fission Infotech Pvt Ltd

- Developed a shadow properties app for Android and IOS using React Native and Native Base, with deployment through Expo for a seamless cross-platform experience.
- Created a responsive web application using ReactJS and deployed it using Git for version control.
- Designed and implemented UI for both mobile and web apps, integrating APIs and ensuring efficient data management through Redux and React Hooks.
- Implemented Expo push notifications for Android and IOS, and added reminders feature using Socket.io for the web.
- Added calls and messages feature for both mobile and web platforms.
- Introduced buyer contacts features to simplify buyer management, including a customizable landing page.
- Managed payments using Stripe for both mobile and web platforms.
- Developed a responsive personal project for the portfolio using Next.js, HTML, CSS, and React, showcasing front-end development skills.
